Visually Document Data Processing Activities and Demonstrate Compliance

The EU's General Data Protection Regulation (GDPR) requires organisations to maintain comprehensive and current internal records of their data processing activities. Specifically, Article 30 requires organisations to maintain a record of all processing activities internally, and to make them available to supervisory authorities upon request.

Data Inventory/Mapping is an excellent first step in building a privacy or compliance program. Leveraging years of research and supported by Nymity's deep Privacy Office/DPO expertise, ExpertMapping™, is a simple, automated solution that turns data inventory into an outcome of project reviews completed by a motivated business.

Delivering Business Value
ExpertMapping™ focuses data collection on only what is required and what provides value to the business. This approach to data collection saves significant time and increases the chances of quick and successful implementation while maximizing the probability of long-term use.

Accurate and Timely Information
Article 30 of the GDPR is clear in its requirement for organisations to be able to demonstrate an accurate and up to date record of processing activities. Nymity ExpertMapping™ enables the business to demonstrate with confidence where their data resides, ensure the data is accurate and up-to-date for potential use.
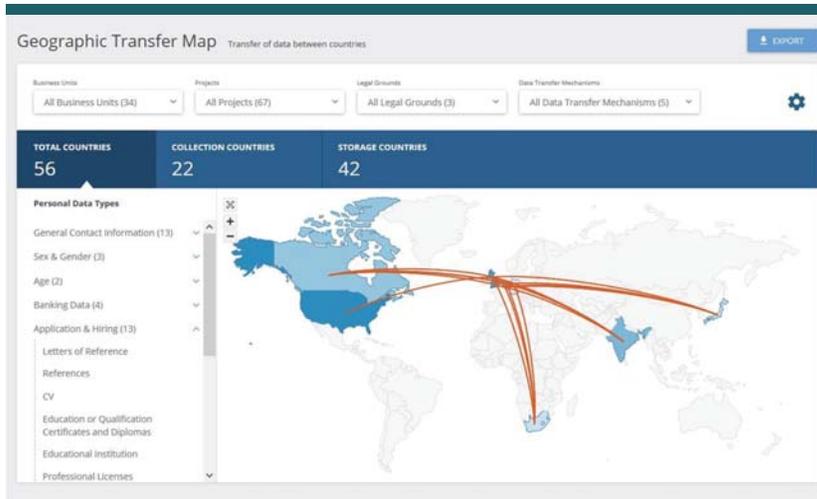

Comprehensive Data Visualization
Nymity ExpertMapping™ provides functional data mapping and visualization with drill-down compliance support capability to answer questions from the management, business and if need be, regulators. Understand and demonstrate your legal grounds for processing, your cross-border mechanism, your risk mitigation to processing and your risk mitigation to individuals.

Features:

	Dynamic Drill-Down Data Mapping	Traditional data flow mapping and innovations such as Proportional Data Maps™, Handoff Data Maps™, Process Benefits Data Maps™, Risk Mitigation Data Maps™, Accountability Data Maps™ and Purpose Data Maps™.
	Accountability Data Use Strategy	Implement a bottom-up data use strategy by identifying specific personal data that will bring the greatest benefit to individuals and the organisation. Promote and repurpose specific uses to help maximize the value to individuals and the organisation.
	On-demand Compliance Reporting for Article 30 (Records of processing activities)	Automated on-demand reports to meet legal and regulatory requirements including regulatory inquires related to data location, data transfer mechanism, legal grounds for processing, risk to individuals, purpose, data type, DPIA criteria, data recipients, data subject, retention periods and which appropriate technical and organisation measures are in use and where.

15 Years of Privacy Compliance Research

For over 15 years, Nymity has been conducting in-depth research on privacy compliance and over 50% of Nymity's employees are experienced privacy professionals. Nymity has supported Privacy Officers with compliance covering over 500 privacy laws to date. The upcoming GDPR may be the largest privacy impacting legislation, but it isn't the last. There are 26 provisions in the GDPR to which each member state in the EU can create delegated acts. The foundation of Nymity's ExpertMapping™ solution is based on ongoing research which helps "future proof" our customers' compliance.
