## FEATURES

### Structured Privacy Management

Structured with over 130+ privacy management activities within 13 privacy management categories, Nymity Templates™ provides a comprehensive framework for privacy management.

### Easy to Use

Each of the 130+ privacy management activities includes:

#### Scope

The scope field provides a definition of the privacy management activity, what it consists of, and what is not included.

#### Business Case

The business case explains the value of the organization engaging in the privacy management activity and can be used by you in your discussions with your organization's privacy sponsor to secure resources and funding for the activity, and obtain buy-in to the process.

### Related Activities

This section provides a list of other privacy management activities that either are pre-requisites, (i.e., they logically should be implemented before the current privacy management activity, or are complementary), (i.e., they complement the current activity and can be done simultaneously or following the current activity to leverage resources and momentum). Rationales are provided explaining why you may also wish to implement those privacy management activities.

### Downloadable Resources

For each privacy management activity, Nymity Templates™ provides practical downloadable documents such as spreadsheets, checklists, case studies, template policies and procedures, real world samples, and videos. The documents are designed to be samples and can be customized to suit your specific purposes.

### Revision History

This section provides a history of updates performed on the selected privacy management activity. For example, when new resources are added or an existing downloadable resource is updated, a revision is added to the list explaining the change and providing a date. This way, users can see if any changes have taken place since first using the document.

### Search Feature

To search for and download a resource document within Nymity Templates™, simply enter a keyword(s) e.g. "notice", "third-parties", or "Risk". A list of relevant documents will be listed for viewing or downloading.

### Resource Trends

At-a-glance, see a graphical representation of the trends in resources downloaded by Nymity Templates™ users.

### Reports

Receive weekly or monthly reports tracking trends such as:

- Top privacy management activities viewed by users
- Top downloadable resources opened by users
- Recently updated resources and new content added
